

Citizen Clout. The American citizen and counterparts in other countries around the world, by virtue of purchasing, investment and voting power have massive power potential yet to be wielded.

1. **Cash Flow.** The single-most important thing that Americans can do is to stop any activity that results in cash flow to China. This means consumer purchases, investments and business engagement. Denial of cash directly weakens the CCP and sabotages their strategy. This implies “Buy America”, as well as buy from proven US allies. This is baseline American resistance to CCP authoritarian expansionism.
2. **Boycott.** Isolate and boycott US and foreign businesses and organizations that cater to and or accommodate the CCP / China. This include businesses advertising on TV, radio and national publications which cater to China. The American consumer and investment dollar is potent. Wield this like a club from household level upwards.
3. **Isolate and Eliminate.** Punish national, state and local lawmakers who directly and indirectly accommodate CCP and China. Get them out of office. Promote candidates who take a stand for “Buy America” and buy from US allies. This is a citizens’ warfare battle front to sustain for all Americans. This involves an organized Name-Blame-Shame-Tame campaign that neuters politicians and lawmakers who merit such.
