

Macro Facts. The linkage of the following facts provides a set of vulnerabilities that make the Chinese Communist Party highly vulnerable.

1. CCP's responsibility and intent for COVID-19 has exposed CCP's ill-willed strategy of global dominance. It is now impossible for CCP to hide from this.
2. CCP's model is dependent on corruptive, coercive and repressive methods that are extraordinarily expensive to sustain. Fatally cash-dependent.
3. Cash flow to China is now significantly declining, because CCP has been "found out" and the global community is pushing back. "Facts exposed" equate to reduction in life-blood cash. This is now unstoppable.
4. CCP leadership knows its vulnerabilities, but it cannot fix itself. Their only option is to use of wolf diplomacy, disinformation, and increased coercion. These are self-defeating as more and more evidence against the CCP accumulates globally. A Black Hole effect.
5. CCP leadership also knows it is overextended and cannot protect its global holdings. It does not have military power projection for this.
6. CCP has now has too many problems internally and globally to successfully manage by coercive methods alone. These only work in circumstances that CCP can control.
7. China has fatal dependencies on imported food to feed their people, as well as growing dangers from unemployment.
8. The CCP has rising dissatisfaction at home and deep-seated anti-China hatred in its perimeter countries.
9. CCP's model is fundamentally based on lies. It lacks natural regenerative capacity.
10. CCP's authoritarian governance and economics fundamentally run counter to the most basic of all human instincts to be free. This has no chance of being accepted by the Free World.
